liability implications of AI, the Internet
of Things and Robotics

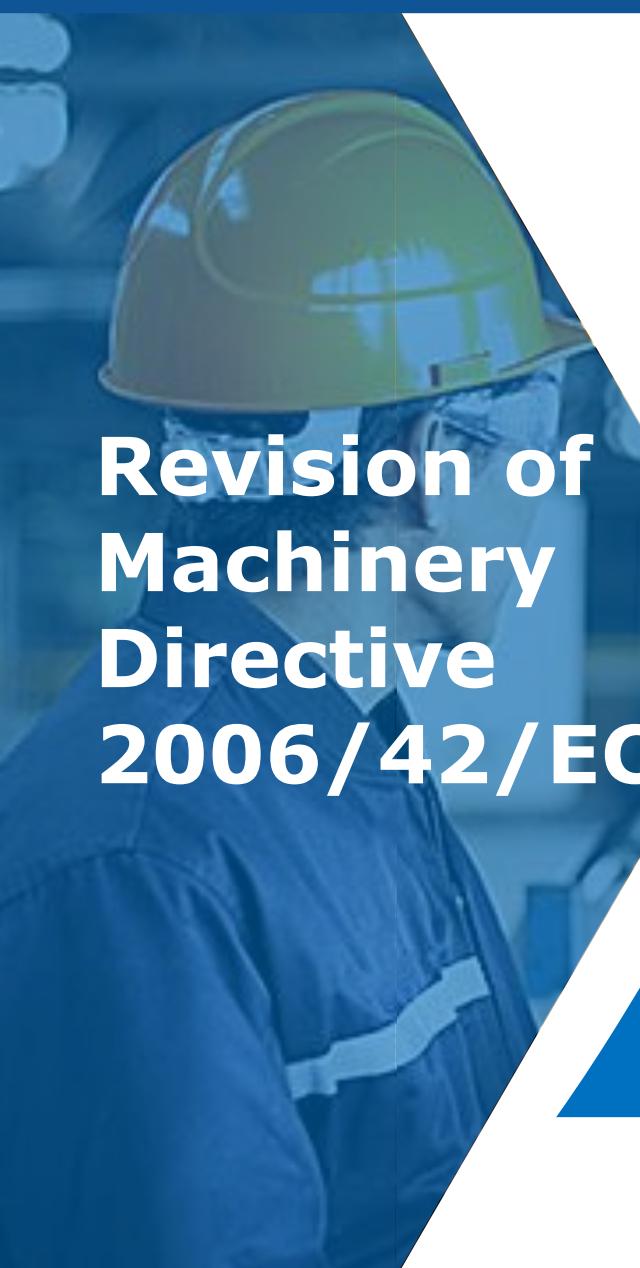

Revision of Machinery Directive 2006/42/EC

General objectives

Keep ensuring a high level of safety and protection for users of machinery and other people exposed to it, and establish a high level of trust in digital innovative technologies for consumers and users.

Keep ensuring the well-functioning of the (digital) single market. Create a level playing field for economic operators and preserve the competitiveness of the machinery sector in global digital markets.

Revision of Machinery Directive 2006/42/EC

Specific objectives:

- Adapt to the risks of emerging digital technologies
- Ensure greater legal clarity in scope and definitions
- Reassess high risk machines and related conformity procedures
- Reduce paper-based requirements for documentation
- Ensure coherence with new legislative framework
- Reduce costs of transposition

Thank You !!
